

DaaS

Desktop as a Service

DaaS solutions provide complete hosted desktops securely delivered over the web. DaaS is virtually the same as VDI, but the infrastructure is cloud-based. Organizations that subscribe to a DaaS offering don't need to manage their hardware.

vDesk
works

DaaS grows your business and solves infrastructure & hardware dependency.

DaaS is beneficial for small, medium-sized businesses. Every business needs infrastructure and computers.

DaaS can be the solution for customers who like the centralization and standardization of VDI. They are attracted to the simplicity of having a professional organization perform essential desktop management on their behalf. DaaS offers many advantages to IT by simplifying operations and delivering Windows desktops and apps securely to its workforce.

3 Ways to Describe DaaS

1

The desktop lives in the cloud.

2

Improved accessibility at a lower operating cost.

3

Greater agility and responsiveness while being in a secure environment.

WHY SHOULD ORGANISATIONS ADOPT DaaS?

Cost Effectiveness

Virtual Desktop may cost 2 times less than a traditional PC as there are less moving parts, absence of a local hard disk, and reduced power consumption.

Better Security & Compliance

DaaS shifts the security burden away from the individual device and places it within a data center infrastructure that is geared up for the highest levels of protection and compliances.

Mobility

Access to a personal PC desktop experience from anywhere, using any device, including Macbooks, Chromebook, tablets, and other mobile devices.

Flexibility

The dynamic nature of DaaS, with its rapid provisioning, inherent scalability and Opex model is fit for organizations needing to expand quickly or wanting to respond to time critical opportunity

BENEFITS OF DaaS

- Improved accessibility
- Reduced capital expenditure
- Greater agility and responsiveness
- Enhanced security
- Tighter alignment with business needs
- Heightened reliability
- Greater budget predictability
- Increased productivity
- Better green profile
