

# IT PROBLEMS?

VIRTUAL DESKTOPS MAY BE THE ANSWER

## WHAT CHALLENGES IS YOUR IT DEPARTMENT FACING?

Businesses may need to purchase additional hardware and upgrades to scale up their data storage to support more users.

Mandatory software upgrades are required to ensure fail-safe systems are in place, in case a hardware failure occurs. You may need to ensure that all the necessary hardware, security measures are in place, and keep them running smoothly.

## HERE ARE JUST A FEW OF THE THINGS DAAS CAN HELP WITH

Reduces the resources required to support and administer end-user computing (OS patches and other updates can be push through a centralized system)

Enabling the use of personal devices (BYOD)

Disaster recovery/emergency preparedness (in the case of natural or electronic disaster, employees can maintain access to the organization's desktop environments)

Data is no longer vulnerable on a local device but held and regularly backed up in a secure hosted environment

Simplifying application deployment

11%

reduction in desktop support spending

23%

reduction in desktop downtime

76%

reduction in average recovery time

20%

reduction in time spent on routine maintenance
